Road to Renewal

Library Vision Statement

A network for discovering and retrieving (living) information.

A "launching pad" for turning information into knowledge, advancing ideas, and experimenting.

Georgia Tech Library will define the technological research library of the 21st century.

We will enable people to explore the past and design the future by bringing together inspirational spaces, curated content, expert guidance, and scholarly communities.

Showcase physical and digital content and activity by and at Tech.

Inspire users to create new scholarship and allude to "what's next."

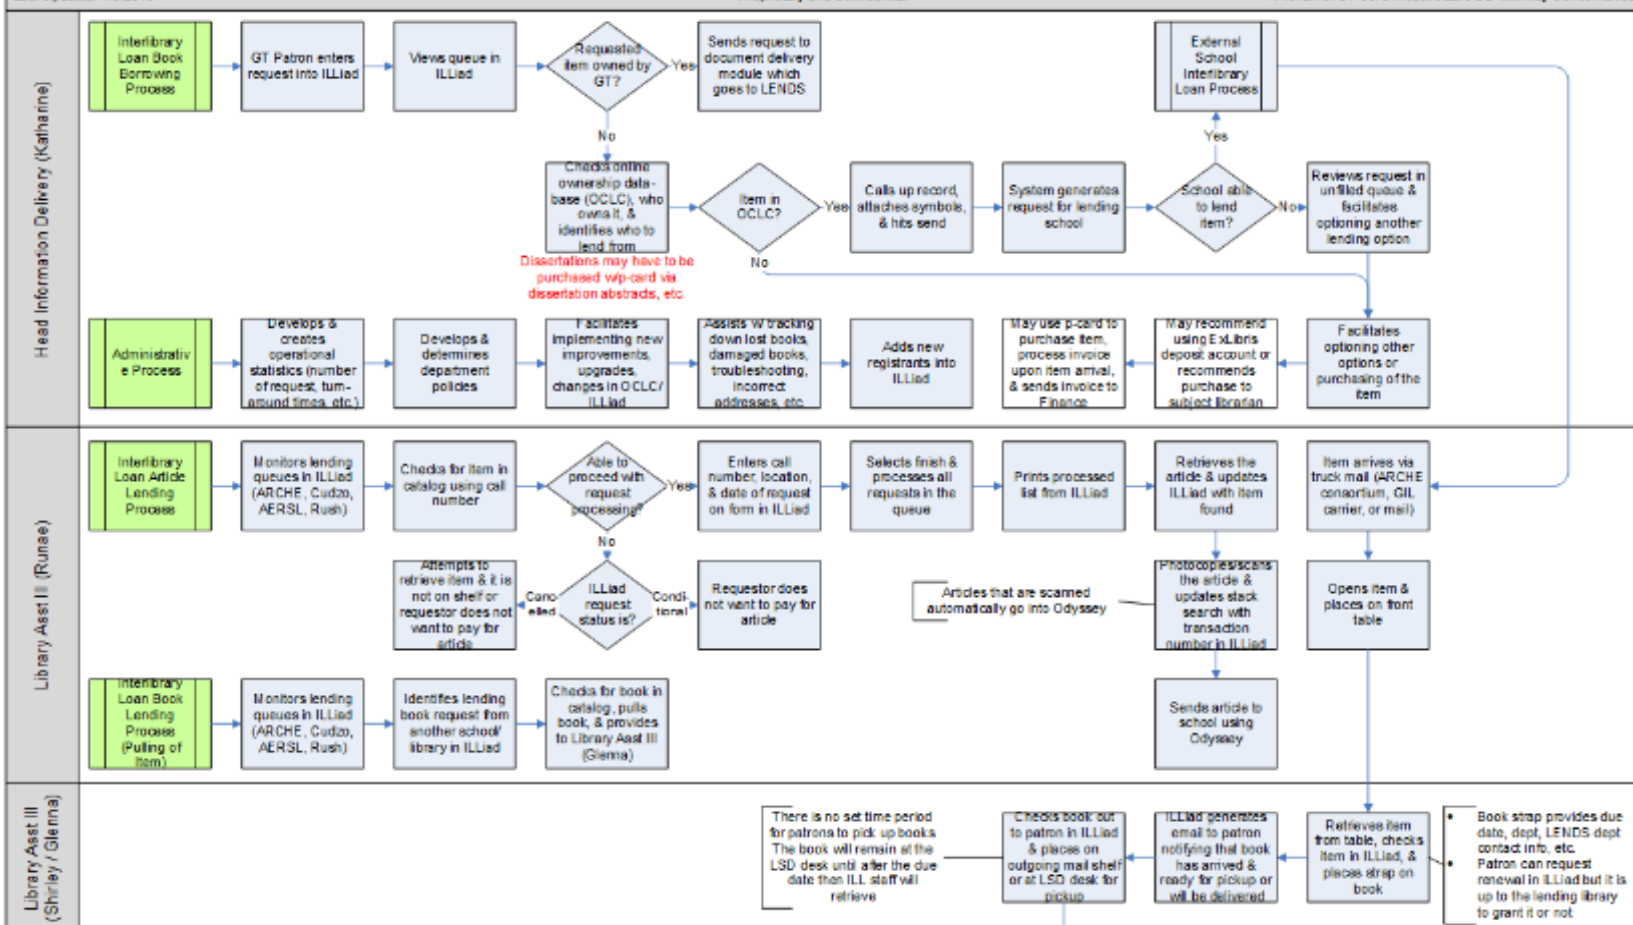

Help people carry out their visions and proactively uncover needs. The Library is not just about its spaces and collections, but is driven by its people and their expertise and knowledge.

Bring people together from across campus to share and collaborate. Connect them to communities around the world.

The Library's Digital Media Experience Lab

Ryerson University Student Learning Centre, Toronto, 2015 The sixth floor, known as the Beach, offers the most casual study environment, a coveted spot since the centre opened in March.
